~ > profile

Personally

Passionate about technology and innovation. I'm creative when generating ideas, curious to explore alternatives, and consistent when it's time to get things done. I value quality, get straight to the point, and stay calm to make clear-headed decisions.

Professionally

I lead technical teams and collaborate with multidisciplinary areas to build robust, scalable products. I currently lead a team building AI-powered applications (LLMs, RAG and agents). I foster a culture of collaboration and trust, with direct communication and empathy. I'm drawn to complex challenges and prioritize simple, efficient, results-oriented solutions.

~ > skills

- Fast learner, quick to adapt to change.
- Designing scalable, maintainable solutions.
- Technical leadership and coordination of multidisciplinary teams.
- Full-stack (Python/FastAPI · React/TS) with DevOps practices (CI/CD, AWS/GCP) and applied AI (LLMs/RAG), product-oriented.

~ > work experience

Helpia / Botiax

Tech Lead

06/2024 – Present
Montevideo, Uruguay (Remote)

- Technical leadership and coordination with product and QA teams.
- Defined architecture, coding standards and best practices.
- Implemented CI/CD, monitoring and alerting for production environments.
- Designed and developed scalable backend APIs and services.
- Built reusable frontend interfaces and components.

Technologies: Python, FastAPI, Django, PostgreSQL, Redis, Docker, GitHub Actions, TypeScript, React, Vite, Tailwind CSS, GraphQL/REST, AWS, GCP, Terraform, LLMs, RAG, OpenAI, GenAI, Anthropic, ChromaDB.

KronosDS S.A.S

Backend Developer

07/2023 – 01/2024

Quito, Ecuador (Remote)

- Backend development with Python/Django.
- API documentation.
- Identified and fixed bugs and vulnerabilities.

Technologies: Python, Django, AWS, Django REST Framework, Docker.

Chagod Tour Jamaica Limited

Full-Stack Developer

04/2021 – 11/2023

Kingston, Jamaica (Remote)

- Led the Frontend team.
- Code review and standards (PRs, quality, accessibility and performance).
- Frontend development for the Chagod Tour website.
- Frontend development for the Chagod Tour admin interface.
- GraphQL backend development for the Chagod Tour site, using Python/Django.

Technologies: Python, Django, Next.js, Styled-Components, Apollo Client, GraphQL, Material-UI, React, JavaScript, TypeScript, Docker, Git/GitLab, GitLab CI.

Auge CRM S.A.S de C.V.

Full-Stack Developer

02/2021 – 09/2021

Monterrey, Mexico (Remote)

- Led the development team.
- Code review and standards (PRs, quality, accessibility and performance).
- Built the Neumaticos Imperio online store with Saleor (Python/Django + GraphQL backend, React frontend).
- Built the Auge Menu platform (Python/Django backend, React/Next.js frontend).
- Built the Auge CRM platform (Python/Django backend, React/Next.js frontend).

Technologies: Python, Django, Saleor, GraphQL, React, Next.js, Styled-Components, JavaScript, TypeScript, Docker, Git/GitLab, GitLab CI.

Katapulk Marketplace

Frontend Developer

10/2020 – 01/2021

Miami, FL, USA (Remote)

- Frontend development for an e-commerce site.
- Backend development using the Spree API.

Technologies: React, Redux, Styled-Components, Node.js, JavaScript, RESTful API, Ruby on Rails, Spree.

Boxitas

Full-Stack Developer

11/2019 – 09/2020

Boulder, Colorado, USA (Remote)

- Software architecture design.
- Full-stack development of a video-streaming application.

Technologies: Next.js, Styled-Components, React, AWS, Amplify, DynamoDB, JavaScript, Python.

10Traits

Full-Stack Developer

01/2019 – 09/2019

Boulder, Colorado, USA (Remote)

- Software architecture design.
- Full-stack development of an online psychological-care platform.

Technologies: Next.js, Styled-Components, React, Firebase, JavaScript.

Kewelta

Full-Stack Developer

01/2018 – 11/2018

Boulder, Colorado, USA (Remote)

- Software architecture design.
- Full-stack development of an advertising-focused social platform.

Technologies: Next.js, Styled-Components, React, Couchbase, Elasticsearch, Python, Django, Ruby on Rails, Node.js, JavaScript.

Empresa de Gases Industriales

Computer Science Specialist

12/2015 – 06/2019

Camagüey, Cuba (On-site)

- Designed and implemented local and wireless network installation projects.
- Administered networks and services (email, browsing, network security, etc.).
- Developed applications and scripts for network monitoring and management.

Technologies: Python, Django, jQuery, JavaScript, Network & Systems Administration.

Empresa de Ómnibus Nacionales – UEB Camagüey

Computer Science Specialist

01/2014 – 11/2015

Camagüey, Cuba (On-site)

- Administered communication networks and services (email, browsing, network security).
- Developed applications for managing and tracking travel tickets.

Technologies: Python, Django, Symfony, PHP, jQuery, JavaScript, Network & Systems Administration.

Dirección Provincial de Radio

Computer Science Specialist

11/2009 – 09/2013

Camagüey, Cuba (On-site)

- Administered networks and services (email, browsing and security) for the provincial office and the municipal radio stations of Camagüey.
- Developed applications and scripts for network monitoring and management.
- Built an application for managing and distributing audio submissions from correspondents and journalists.

Technologies: Symfony, PHP, jQuery, JavaScript, Joomla, Network & Systems Administration, Linux, Windows Server, Squid.

~ > education

Executive Master's in Project Management and Agile

11/2022 – 07/2023 | Málaga, Spain

Methodologies

ESESA IMF

Graduated with an Executive Master's in Project Management and Agile Methodologies from ESESA IMF, gaining the knowledge and skills to lead projects effectively, drive digital-transformation culture, and improve adaptability in a changing environment.

Graduated with strong results, pushing myself to become a high-level specialist. The program focused primarily on software development, where we studied Java; I also personally explored PHP development, specifically using the Joomla CMS and the Symfony framework. I leaned toward open-source software, mainly using the Debian/Linux distribution, and was also introduced to network administration, which went on to shape my professional path after graduating.

IT Project Management

University of Camagüey

04/2022 | Camagüey, Cuba

Module from the Master's in Applied Computer Science.

Advanced Software Engineering

University of Camagüey

03/2022 | Camagüey, Cuba

Module from the Master's in Applied Computer Science.

Computer Architecture and Networks

University of Camagüey

12/2021 | Camagüey, Cuba

Module from the Master's in Applied Computer Science.
